

NouvaDerm

1927nm Thulium Fractional Laser · Post-Treatment Instructions

POST-TREATMENT CARE

Your skin is in an active healing phase. Following these instructions precisely protects your investment and significantly improves your final result.

NOUVAGlo (Non-Ablative Mode)

Days 1–3

- Apply **Epicutis Lipid Recovery Mask** as directed — use in-clinic application as your baseline.
- Apply **Epicutis Lipid Serum + HYVIA Crème** 2–4× daily.
- Cleanse gently with **Epicutis Oil Cleanser** or **Noon MicroSoft Cleanser** only.
- Apply **broad-spectrum SPF 50+** every morning — reapply every 2 hours if outdoors. Non-negotiable.
- Mild redness, warmth, and bronzing are expected and normal during this period.
- No exfoliants, retinoids, AHAs, BHAs, or vitamin C.

Days 3–5

- Continue **Epicutis Lipid Serum + HYVIA Crème**; pinpoint micro-crusting is normal — do not pick.
- Continue gentle cleansing; continue SPF daily.
- Noon **Igloo Moist** may be added for additional hydration comfort.

Day 5+

- Begin reintroducing Noon concern-specific products — start with gentle options (**Halo-Ronic Serum, HydroCalming + Vit Complex**).
- Return to full Noon protocol appropriate to your skin concern by Week 2.

Ablative Mode

Days 1–5 (Active Healing)

- Apply **Epicutis full recovery protocol** up to 4× daily: Oil Cleanser → Lipid Serum → HYVIA Crème → Lipid Recovery Mask.
- Keep skin continuously moisturised — do not allow treated areas to dry out.
- Do not pick, peel, or rub any flaking or crusting — allow natural shedding.
- Social downtime of **5–10 days** is typical — plan accordingly.

Week 2+

- Begin broad-spectrum **SPF 50+** as soon as re-epithelialization is complete.
- No retinoids, AHAs, BHAs, or vitamin C until your physician clears their reintroduction — typically 2 weeks minimum.

NouvaDerm

1927nm Thulium Fractional Laser · Post-Treatment Instructions

POST-TREATMENT CARE

- **Strict sun avoidance** for a minimum of 2 weeks — any UV exposure risks pigmentation.
- Follow-up **OBSERV 360 skin analysis** at 4–6 weeks post-treatment to assess results.

GENERAL RULES — BOTH MODES

- No makeup for **24–48 hours** post-treatment (longer for ablative).
- Avoid heat exposure — saunas, hot yoga, steam rooms, very hot showers — for **72 hours**.
- No swimming in chlorinated water for **5 days**.
- Sleep on a **clean pillowcase**; consider elevated head position for the first 2 nights.
- Avoid vigorous exercise for **48 hours** — elevated body temperature slows healing.
- Call us immediately if you develop **blistering, significant swelling, or signs of infection**.

Your next treatment will be booked 4 weeks after NOUVAGlo, or as directed by your physician for Ablative mode. Contact us at aesthetics@treasuryhealth.ca with any concerns.
