

PlaDuo Pro

Dual Plasma (Nitrogen + Argon) · Post-Treatment Instructions

POST-TREATMENT CARE

PlaDuo Pro treatments are low-downtime, but your skin still benefits from careful post-care to maximise results and protect the treated barrier.

IMMEDIATELY AFTER TREATMENT

- **EXO|E Skin Revitalizing Complex** (AMP exosome product) is applied immediately post-procedure in-clinic.
- **RE|PAIR Post-Treatment Skincare Serum** (AMP) helps maintain hydration and minimise redness.
- Mild redness and warmth are normal for 24–48 hours, particularly after Argon mode.
- Do not touch or rub the treated area for the first few hours.

Days 1–2

- Cleanse gently with a non-foaming, fragrance-free cleanser or **Epicutis Oil Cleanser**.
- Apply **Epicutis Lipid Recovery Mask** as a soothing barrier layer.
- Follow with **Epicutis Lipid Serum + HYVIA Crème** 2× daily.
- Apply **broad-spectrum SPF 50+** every morning — do not skip.
- No active skincare: avoid retinoids, AHAs, BHAs, and vitamin C.

Days 3–5

- Continue **Epicutis Lipid Serum + HYVIA Crème** for barrier support.
- Most patients experience minimal visible downtime by Day 2–3.
- Continue **SPF** diligently — plasma treatments increase photosensitivity.
- Avoid exfoliants until Day 5 minimum.

Day 5+

- Reintroduce your Noon concern-specific skincare gradually.
- For acne: resume **Noon Lacto-S Oil Control + Noon S-Peel** as tolerated.
- For rosacea: resume **Noon HydroCalming + Vit Complex + Noon MicroSoft Cleanser**.
- Return to full protocol by Week 2.

GENERAL RULES

- Avoid **makeup** for 24 hours post-treatment.
- Avoid **heat** (saunas, steam, hot yoga) for 48 hours.
- No **swimming** in chlorinated water for 3 days.
- Avoid vigorous exercise for **24–48 hours**.
- **Acne patients:** an initial purging phase is expected — call us if cysts become painful or widespread.

POST-TREATMENT CARE

- Contact us immediately for blistering, significant swelling, or signs of infection.

SESSION FREQUENCY

- **Acne protocol (Argon mode):** weekly sessions for the first 4 weeks, then monthly maintenance.
- **Rosacea/skin quality (Argon or Nitrogen):** every 4 weeks for 4–6 sessions.
- **Biologics add-on:** EXO|E Skin Revitalizing Complex or Avari Purasomes applied at each session for enhanced regeneration.

Your next session will be scheduled as per your treatment protocol. Reach us anytime at aesthetics@treasuryhealth.ca
