

PlaDuo Pro

Dual Plasma (Nitrogen + Argon) · Pre & Post-Treatment Care

PRE & POST-TREATMENT CARE

PRE-TREATMENT INSTRUCTIONS

PlaDuo Pro uses patented SpinShot Technology to deliver both nitrogen plasma and argon plasma. These simple steps maximise efficacy and keep your skin safe.

SKINCARE PREPARATION

- Your provider will apply **AMP D|TOX Pre-Treatment Skincare Serum** (or a gentle fragrance-free pre-treatment prep serum) at the start of your appointment — no action required from you.
- Discontinue **retinoids and AHA/BHA exfoliants** 3–5 days before your appointment.
- Arrive with **clean, makeup-free skin** — no serums, oils, or moisturisers on the treatment area.
- Avoid using any harsh or active skincare the day before treatment.

SUN & LIFESTYLE

- Avoid **direct sun exposure and tanning beds** for 2 weeks prior.
- Do not use **self-tanner** for 2 weeks prior.
- If you have a history of **cold sores (HSV)**, inform your provider — antiviral prophylaxis may be prescribed.
- Avoid **isotretinoin (Accutane)** within 6 months of treatment.

ACNE & ROSACEA PATIENTS — ADDITIONAL NOTES

- If treated with **PlaDuo Pro Argon** for active acne: initial sessions may be weekly to achieve clearance before spacing out.
- A temporary **purging period** is normal after Argon plasma for acne — this is a sign the treatment is working.
- Continue any prescribed oral or topical acne medications unless your physician advises otherwise.
- For rosacea: avoid spicy foods, alcohol, and temperature extremes in the 48 hours before treatment.

DAY OF TREATMENT

- Arrive with completely clean skin — no SPF, makeup, or skincare products.
- Topical anaesthetic is not routinely required; inform your provider if you have low pain tolerance.
- Treatment sessions are typically 30–45 minutes.

POST-TREATMENT INSTRUCTIONS

PlaDuo Pro

Dual Plasma (Nitrogen + Argon) · Pre & Post-Treatment Care

PRE & POST-TREATMENT CARE

PlaDuo Pro treatments are low-downtime, but your skin benefits from careful post-care to maximise results and protect the treated barrier.

Day 0 — Immediately After Treatment

- **Hale Derma Cleanser** (*or your own gentle, fragrance-free non-foaming cleanser*) — used in-clinic at end of treatment.
- **EXOJE Skin Revitalizing Complex** (*or your own exosome or growth factor serum*) (AMP) — applied immediately post-procedure in-clinic.
- **RE|PAIR Post-Treatment Skincare Serum** (*or your own fragrance-free barrier repair serum*) (AMP) — applied to maintain hydration and minimise redness.
- Mild redness and warmth are normal for 24–48 hours, particularly after Argon mode.

Days 1–2

- Cleanse gently with **Hale Derma Cleanser** (*or your own gentle fragrance-free non-foaming cleanser*).
- Apply **Epicutis Lipid Recovery Mask** (*or your own fragrance-free occlusive barrier mask*) as a soothing layer.
- Follow with **Epicutis Lipid Serum + HYVIA Crème** (*or your own fragrance-free hydrating serum and barrier moisturiser*) 2× daily.
- Apply **broad-spectrum SPF 50+** every morning — do not skip.
- No retinoids, AHAs, BHAs, or vitamin C.

Days 3–5

- Continue **Epicutis Lipid Serum + HYVIA Crème** (*or your own fragrance-free barrier moisturiser*) for ongoing barrier support.
- Most patients experience minimal visible downtime by Day 2–3.
- Continue SPF diligently — plasma treatments increase photosensitivity.

Day 5+

- Reintroduce your concern-specific skincare gradually.
- For acne: resume **Noon Lacto-S Oil Control** (*or your own oil-control treatment serum*) + **Noon S-Peel** (*or your own gentle enzyme exfoliant*) as tolerated.
- For rosacea: resume **Noon HydroCalming + Vit Complex** (*or your own calming antioxidant serum*) + **Noon MicroSoft Cleanser** (*or your own gentle fragrance-free cleanser*).
- Return to your full skincare protocol by Week 2.

GENERAL RULES

- No makeup for **24 hours** post-treatment.
- Avoid heat — saunas, steam, hot yoga — for **48 hours**.

PlaDuo Pro

Dual Plasma (Nitrogen + Argon) · Pre & Post-Treatment Care

PRE & POST-TREATMENT CARE

- No swimming in chlorinated water for **3 days**.
- Avoid vigorous exercise for **24–48 hours**.
- **Acne patients:** purging is expected — call us if cysts become painful or widespread.
- Contact us immediately for blistering, significant swelling, or signs of infection.

SESSION FREQUENCY

- **Acne — Argon mode:** weekly for the first 4 weeks, then monthly maintenance.
- **Rosacea / skin quality:** every 4 weeks for 4–6 sessions.
- **Biologics add-on: EXO|E Skin Revitalizing Complex** (*or your own exosome or growth factor serum*) or **Avari Purasomes** (*or your own premium exosome serum*) applied at each session for enhanced regeneration.

Your next session will be scheduled per your treatment protocol. Reach us anytime at aesthetics@treasuryhealth.ca
